

An introduction to treasury management

21 & 22 July 2020 (online course)

The objective of the virtual course is to introduce participants to treasury management. It provides an overview of treasury operations within financial services, more specifically within building societies and within the regulatory environment. Following this there is an in-depth study of treasury operations, focusing on liquidity, wholesale funding, credit risk and financial risk.

The course will be of interest to: non-executive directors, senior management, risk officers/managers new to the building society world, those in related areas who require some background treasury knowledge, as well as those who have recently started work in the treasury function.

This course is being run virtually due to Covid-19 and will revert to 'in-person' as soon as it's safe to do so.

"Very useful and informative. Useful resources. Definitely leaving with a firm understanding of treasury management."

(Delegate feedback – November 2019)

"Very good presenting style, good use of examples and putting things in simple terms."

(Delegate feedback – November 2019)

Course presenter:

Dean Carter is an experienced building society treasury and risk professional having worked in both London and Paris and formerly as Head of Treasury at the Nottingham Building Society. He has also held the executive post of General Manager – Operational Risk and Compliance.

His work as Director of Treasury Solutions at King & Shaxson includes investment and funding advice, treasury training, risk management advice and policy & procedures advice and review, interest rate forecasting and economic reviews, ALCO attendance and advice, and counterparty services advice.

Dean also assists firms considering or changing treasury approaches to risk management.
